

Visual pre-shipment loading report – FENCE			
Project:	Generic	Client:	NA
Date:	Year 2013	Reported by:	Chris Portelli for Jarlso AS

REPORT SUMMARY

The report is completed exclusively for Jarlso AS with the intent to document the provision of palisade fence for any of its clients. Additional material such as detailed trial assembly test report and design are available upon request. Jarlso is able to provide fence with any type of pale or anti-theft bolt as requested by clients. For more details contacts Jarlso AS via company web page www.jarlso.com

Material quality testing and individual bundle marking is conducted by third party in conjunction with Jarlso AS personnel and factory production plant managers.

Specific note about the trial assemble of palisade fence

Razor wire and actual connection bolts had not be sourced at the time of fence trial. Temporary bolts have been used and as a means of time saving short bolts have been used. For this reason, one will notice that the pales are installed facing inwards. This has no effect as it was verified in several locations that the pales can be installed in both direction.

This has also been a good indicator as it is by far more difficult to access the bolt from outside when the pales are installed facing inwards.

TABLE OF CONTENTS:

Trial of palisade fence	Page 2 & 3
Palisade fence bundles ready for loading	Page 4 & 5
Internal inspection of good/quantities prior shipment	Pages 6 & 7
Loading plan for containers	Page 8
Loading of containers	Pages 9 to 11

Loading schedule

Generic loading scedual. Each TEU loaded in same way making unloading for clients easy to understand and manage

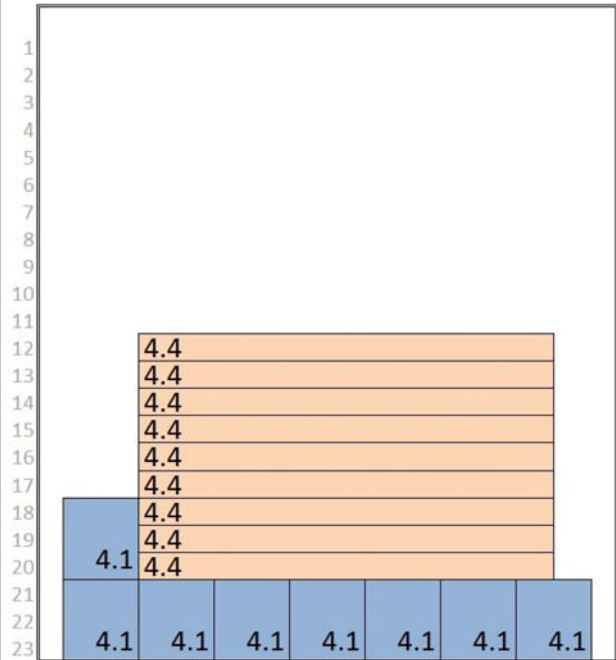

This example is based on a significantly large order and therefore razor wire and bolts have been shipped independantly to optimize packing.

20ft INTERNAL FLOOR LAYOUT

20ft FRONTAL VIEW (behind lot, this lot being packed first)

20ft FRONTAL VIEW (first behind door)

L1	Pales
L2	Horizontal supports
L3	Posts
L4	Gate
